

Krishiraj Santchurn

Civil & Structural Engineering • BIM + Computational • Commercially Aware

Melbourne VIC, Australia • santchurnkrishiraj@gmail.com • [0432 399 251](tel:0432399251) • linkedin.com/in/krishiraj-santchurn • ksantchurn.com

PROFESSIONAL SUMMARY

Civil Engineering (Honours) student targeting graduate and entry-level roles in structural, civil and infrastructure engineering. Brings hands-on structural design experience from consultancy — reinforced-concrete design and AutoCAD documentation — alongside site and construction exposure on large-scale (~1,000-unit) housing developments, including with a national infrastructure ministry. CAPM-certified and fluent in core engineering software (Revit/BIM, Civil 3D, SpaceGass), with a commercial grounding in accounting and a record of project coordination and stakeholder engagement — differentiators that complement a solid technical foundation.

TECHNICAL SKILLS

Structural & Civil: Structural design, reinforced-concrete design, RC calculations, steel design, structural analysis, road design, site supervision, technical documentation

Software & BIM: Revit, BIM, Autodesk Civil 3D, AutoCAD, SpaceGass, ArcGIS Pro, Dynamo, digital-twin data

Programming & Cloud: TypeScript, React, Next.js, Amazon Web Services (AWS Lambda, DynamoDB)

Commercial & Project: Project management (CAPM), accounting (ACCA), Microsoft Excel, Microsoft Office Suite

Fabrication: 3D printing, laser cutting, rapid prototyping

EDUCATION

Bachelor of Civil Engineering (Honours), Minor in Environmental Engineering

Monash University, Melbourne, Australia | Jul 2023 – Jul 2027

- Awarded the Sir John Monash Fee Scholarship and the Engineering International High Achievers Scholarship.

Advanced Diploma in Accounting and Business

Association of Chartered Certified Accountants (ACCA), United Kingdom | Jan 2022 – Dec 2024

EXPERIENCE

Structural Intern — Lux Consult

Mauritius | Dec 2025 – Jan 2026

- Produced reinforced-concrete design calculations (Excel) and full AutoCAD documentation for residential structures — villas, extensions and renovations — worked to senior-engineer review.
- Delivered 10+ technical drawings across 5+ structural design projects, improving documentation consistency and design turnaround.
- Applied structural design principles to real member sizing and detailing, translating engineering intent into buildable drawings.

Engineering Intern — Ministry of National Infrastructure

Mauritius | Dec 2024 – Jan 2025

- Supported site engineers on a large-scale (~1,000-unit) government housing development, tracking construction progress and assisting with quality and safety monitoring.
- Coordinated between engineers and contractors to keep concurrent works aligned on program and specification, strengthening site-delivery understanding.

Site Engineer Intern — Tayelamay Group

Mauritius | Nov 2023 – Feb 2024

- Assisted site engineers on a large (~1,000-unit) housing development, gaining direct exposure to construction sequencing, modular building methods and site coordination.
- Supported daily site activities, quality and safety checks, and progress reporting in an active construction environment.

Prototyping Division Sub-Lead — Monash Sustainable Buildings

Melbourne, Australia | Jul 2023 – Mar 2026

- Led the prototyping division for student-led sustainable building projects, producing components with CAD, 3D printing and laser cutting.
- Trained and onboarded new members and coordinated prototype design and fabrication across the team.

PROJECTS

Aboriginal Gathering Place — Structural Engineer (Final-Year Capstone)

2026 | Revit, SpaceGass

- Leading the structural discipline: compared reinforced-concrete and steel schemes for a column-free hall, then developed the preferred scheme into a coordinated Revit and SpaceGass model.

BIM Modelling in Revit — Self-Directed

2026 | *Revit, BIM*

- Modelled a multi-unit apartment building end to end, including architectural layouts, plans and a steel structural frame with column grid.

Digital Twin Fire-Alarm Verification — Research Project

2026 | *Digital Twin, Data Analysis*

- Applied digital-twin data to reduce false fire alarms in institutional buildings.

Rafflesia Vision Valley — Arterial Link Road Design

2025 | *Autodesk Civil 3D*

- Planned and designed two Austroads-compliant arterial link roads in Civil 3D for a logistics development.

FairWork Student — Full-Stack Platform

2025 – 2026 | *Next.js, AWS Lambda, DynamoDB*

- Built a full-stack collaboration platform to improve fairness and accountability in university group work.

LEADERSHIP & ACTIVITIES

Founder & President — Monash Mauritian Society

Nov 2024 – Present

- Founded a cultural student society, secured AUD \$4,000 in sponsorship, and grew it into a Melbourne-wide Mauritian student community spanning six universities.

Founding Group Leader — AWS Student Builder Group, Monash

Sep 2026 – Present

- Selected to establish Monash's AWS cloud-computing student community from the ground up.

Committee Member — ACES, Monash Association of Civil Engineering Students

Apr 2024 – Present

- Supported student events and academic and industry initiatives, including the annual Industry Night.

Campus & Student Ambassador — Monash University

May 2024 – Present

- Represented the Faculty of Engineering and the university across recruitment, outreach and engagement.

CERTIFICATIONS

- CAPM® – Certified Associate in Project Management, Project Management Institute (2026)
- CPCWHS1001 – Construction Induction (White Card)
- Taekwondo 1st Dan Black Belt – Kukkiwon (World Taekwondo Headquarters), Cert. No. 05752827 (2022)

INTERESTS

- Competitive martial arts: 14 years of Taekwondo (Kukkiwon 1st Dan Black Belt); currently train wrestling and Brazilian Jiu-Jitsu (BJJ) daily — building discipline, resilience and strong time management alongside full-time study.
